# 1 Overview

## 1.1 Introduction

The JT100 is a NovaStar multimedia player targeted for small and medium-sized full color LED screens in transportation field.

With the following advantages, the JT100 can better satisfy users' needs.

- Loading capacity up to 650,000 pixels
- Powerful processing capability
- Dual-Wi-Fi mode
- Redundant backup

## 1.2 Application

The JT100 can be widely used in transportation related LED applications as shown in [Table 1-1](#).

Table 1-1 Application

Application	Screen Type
Expressway	<ul style="list-style-type: none"><li>• Integrated information displaying screen at toll gate</li><li>• F-shape screen at toll gate</li><li>• Variable message LED screen</li><li>• Traffic guiding screen</li></ul>
Urban road	Traffic guiding screen
High-speed railway/subway station	Passenger information system displaying screen
Parking lot	Parking guidance screen

# 2 Features

## 2.1 Powerful Processing Capability

The JT100 features powerful hardware processing capability:

- 1.5 GHz eight-core processor
- H.265 4K high-definition video hardware decoding playback
- 1080P video hardware decoding
- 2 GB operating memory
- 8 GB on-board internal storage space with 4 GB available for users

## 2.2 Dual-Wi-Fi Mode

The JT100 has permanent Wi-Fi AP and supports the Wi-Fi Sta mode, carrying advantages as shown below:

- Completely covers Wi-Fi connection scene. The JT100 can be connected to through self-carried Wi-Fi AP or the external router.
- Completely covers client terminals. Mobile phone, Pad and PC can be used to log in to the JT100 through wireless network.
- Requires no wiring. Display management can be managed at any time, having improvements in efficiency.

JT100's Wi-Fi AP signal strength is related to the transmit distance and environment. Users can change the Wi-Fi antenna as required.

### 2.2.1 Wi-Fi AP Mode

Users connect the Wi-Fi AP of a JT100 to directly access the JT100. The SSID is “**AP + the last 8 digits of the SN**”, for example, “**AP10000033**”, and the default password is “**12345678**”.

## 2.2.2 Wi-Fi Sta Mode

Configure an external router for a JT100 and users can access the JT100 by connecting the external router. If an external router is configured for multiple JT100 units, a LAN can be created. Users can access any of the JT100 via the LAN.

## 2.2.3 Wi-Fi AP+Sta Mode

In Wi-Fi AP+ Sta connection mode, users can either directly access the JT100 or access internet through bridging connection.

## 2.3 Redundant Backup

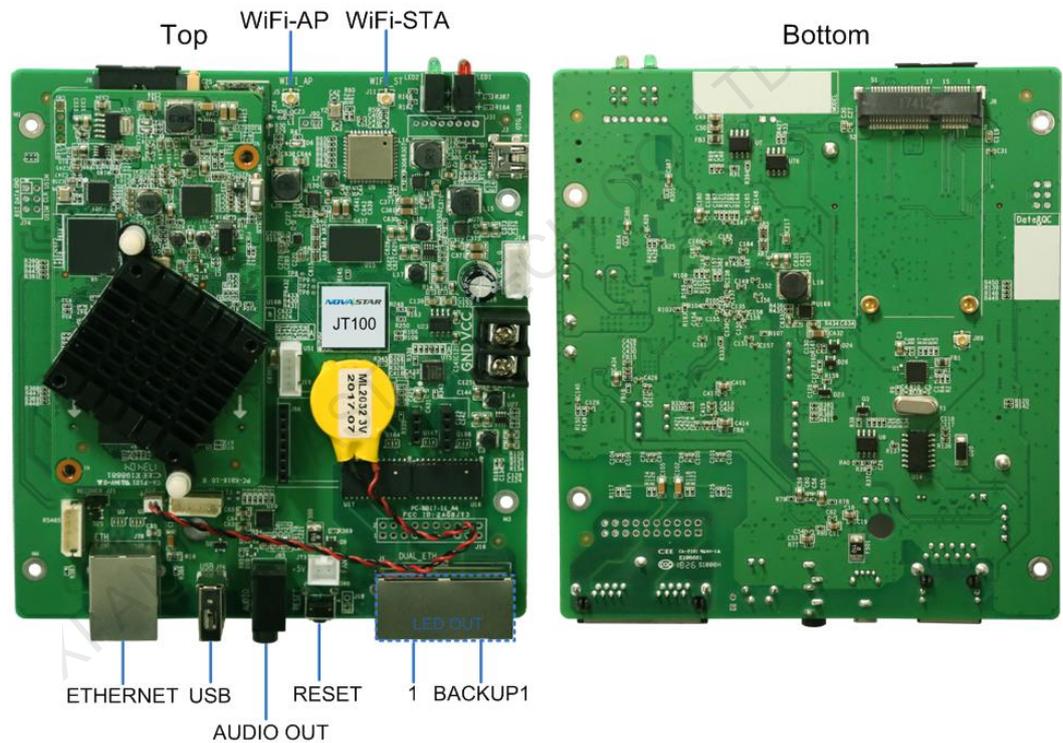

JT100 supports network redundant backup and Ethernet port redundant backup.

- Network redundant backup: The JT100 automatically selects internet connection mode among wired network or Wi-Fi Sta network according to the priority.
- Ethernet port redundant backup: The JT100 enhances connection reliability through active and standby redundant mechanism for the Ethernet port used to connect with the receiving card.

# 3 Hardware Structure

## 3.1 Appearance

Note: All product pictures shown in this document are for illustration purpose only. Actual product may vary.

Table 3-1 Connectors and buttons of the JT100

Name	Description
WiFi-STA	Wi-Fi Sta antenna port
WiFi-AP	Wi-Fi AP antenna port
ETHERNET	Gigabit Ethernet port Indicator status: <ul style="list-style-type: none"> <li>Yellow indicator always on: The unit is connected to</li> </ul>

Name	Description
	100M Ethernet cable and the status is normal. <ul style="list-style-type: none"> <li>Green and yellow indicators always on at the same time: The unit is connected to Gigabit Ethernet cable and the status is normal.</li> </ul>
USB	USB 2.0 port
AUDIO OUT	Audio output
RESET	Factory reset button Press and hold the button for 5 seconds to reset the unit to factory settings.
1	Output Ethernet port
BACKUP1	Backup for output Ethernet port

Note: All product pictures shown in this document are for illustration purpose only. Actual product may vary.

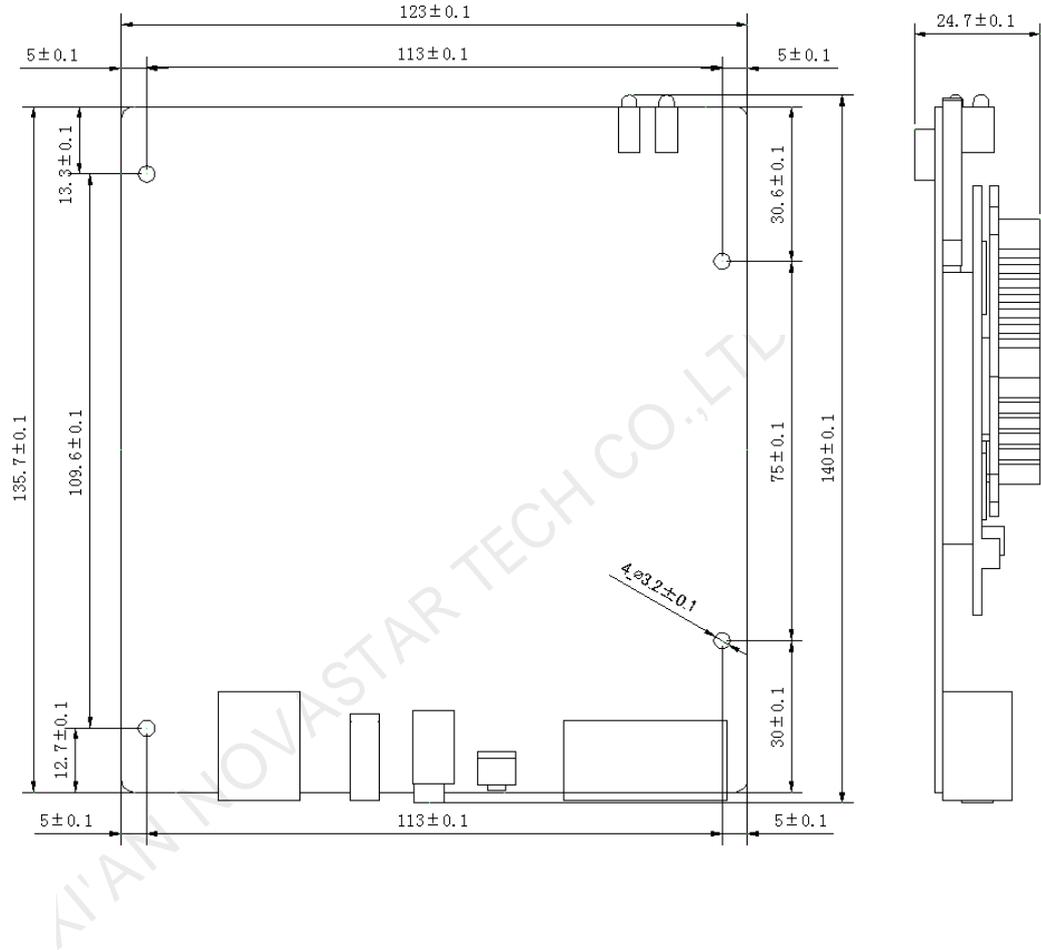

Table 3-2 Indicators of the JT100

Name	Description
PWR	Power status indicator Always on: Power input is normal.
SYS	System status indicator <ul style="list-style-type: none"> <li>Flashing once every 2 seconds: The system is operating normally.</li> <li>Flashing once every 0.5 second: The system is downloading data from the Internet.</li> <li>Always on/off: The system is operating abnormally.</li> </ul>
CLOUD	Internet connection status indicator Always on: The unit is connected to the Internet and the connection status is normal.
RUN	FPGA status indicator Same as the signal indicator status of the sending card: FPGA is operating normally.

### 3.2 Dimensions

The total thickness (board thickness + thickness of the components on the front and back side) is no greater than 25.0mm.

Unit of the dimension chart is "mm". Ground connection is enabled for location hole (GND).

# 4 Software Structure

## 4.1 System Software

- Android operating system software
- Android terminal application software
- FPGA program

Note: The third-party applications are not supported.

## 4.2 Related Configuration Software

Table 4-1 Related configuration software

Software	Description
ViPlex Handy	Client software for mobile device works on both Android and iOS, and is used to enable/disable DHCP and set static IP address for the JT100.
ViPlex Express	Client software for PC works on Windows only, and is used to enable/disable DHCP, set static IP address and update fonts for the JT100.
NovaLCT	Display screen configuration software works on Windows only, and is used to adjust screens to the best display status.
